ATLAS-403: Session expired

An ATLAS-403 error means the current sign-in session has expired.

Ask the customer to sign out, then sign in again.

Do not ask the customer to delete their local cache.

If the error persists, escalate to the support owner with the error code.

Scope of this guide

This procedure covers ATLAS-403 only. Other error codes need their own evidence.

This document does not establish an approved budget or completed launch gates.
